

# DENTAL SOLUTIONS INTERNATIONAL – PUERTO CANCÚN

## All-on-4 in Cancún

### Patient Guide for U.S. Travelers

#### 1. WELCOME

Thank you for your interest in Dental Solutions International – Puerto Cancún. This guide is designed especially for patients living in the United States who are considering traveling to Cancún for a full-mouth reconstruction with All-on-4 implants.

Our goal is to give you a clear, simple overview of:

- What the All-on-4 treatment is.
- Why many U.S. patients choose Cancún.
- Why you need a 3D tomography (CBCT scan) BEFORE you fly.
- How the treatment is organized in two trips.
- The investment per arch and for the full mouth.
- How to start your process step by step.

#### 2. WHAT IS THE ALL-ON-4 TREATMENT?

All-on-4 is a full-arch implant solution.

Instead of placing one implant for each missing tooth, we place four strategically positioned implants in your upper or lower jaw. These implants support a full set of fixed teeth for that arch.

With All-on-4 you can:

- Replace all the teeth in the upper or lower jaw with a fixed bridge.
- Avoid removable dentures that move or come out.
- Recover strong bite function and a natural-looking smile.

All-on-4 is ideal if you:

- Have many missing, broken, or severely damaged teeth.
- Are tired of removable dentures and want a permanent solution.
- Have been told you need to remove most of your teeth and “start over.”

#### 3. WHY MANY U.S. PATIENTS CHOOSE CANCÚN

##### QUALITY OF CARE

You are treated by a specialist with more than 25 years of experience in advanced aesthetic and implant dentistry, using 3D planning and high-quality

implant systems.

## DESTINATION EXPERIENCE

Puerto Cancún is a modern, safe, and beautiful area by the marina and the Caribbean Sea. You receive high-level care while enjoying a medical vacation in one of the most attractive destinations in Latin America.

## TRANSPARENT INVESTMENT

All-on-4 treatments in the U.S. can cost two to three times more than in Cancún. At Dental Solutions International, your investment is clearly defined per arch and for the full mouth.

## 4. YOUR 3D TOMOGRAPHY (CBCT SCAN) BEFORE YOU FLY

Before you book your flight, there is an essential step:

You must obtain a 3D tomography (CBCT scan) of your mouth in your hometown in the United States.

This scan allows us to:

- See the quality and quantity of bone.
- Plan the exact position of the implants.
- Confirm if you are a good candidate for All-on-4 before you travel.

How this works:

1. You contact our team through WhatsApp or our website.
2. We send you a short medical questionnaire and instructions for your CBCT.
3. You schedule the scan at an imaging center or dental radiology clinic near you.
4. You receive the scan in digital format (CD, USB, or downloadable file).
5. You send the file to us by email or WhatsApp.

Once we receive your tomography and photos, our team and the specialist:

- Evaluate your case.
- Confirm if All-on-4 is appropriate for you.
- Outline the plan in general terms.
- Discuss possible dates and length of your trips to Cancún.

This step helps avoid surprises and gives you clarity before you travel.

## 5. HOW MANY TRIPS WILL YOU NEED?

In most cases, the All-on-4 treatment is completed in two main trips.

## FIRST TRIP TO CANCÚN – SURGERY AND IMMEDIATE TEETH

Typical stay: 5-7 days (may vary by case).

During this visit we:

- Confirm the plan based on your 3D tomography and a clinical exam.
- Remove any teeth that need to be extracted in that arch.
- Place 4 implants (sometimes more if needed) in the upper or lower jaw.
- When your case allows it, place a fixed provisional bridge so you leave with non-removable teeth in that arch.

If immediate fixed teeth are not safe in your specific case, we will provide a temporary solution and explain your plan clearly. Long-term safety is always our priority.

## HEALING PERIOD – BACK HOME IN THE U.S.

After implant placement, the implants usually need 3-6 months to fully integrate with the bone. You return home, follow the diet and hygiene instructions we provide, and stay in touch with us online for follow-up.

## SECOND TRIP TO CANCÚN – FINAL TEETH

Typical stay: 7-10 days (may vary by case).

During this trip we:

- Verify that your implants have integrated properly.
- Take new impressions or digital scans.
- Design and fabricate your final full-arch bridge.
- Adjust the bite, esthetics, and comfort so your new smile feels natural and stable.

## 6. WHAT IS INCLUDED PER ARCH?

When we talk about one arch, we mean either the upper jaw or the lower jaw.

Each All-on-4 arch generally includes:

- Specialized diagnostics and treatment planning for that arch.
- Extractions of remaining teeth in that arch (if needed and agreed).
- Placement of 4 implants (or more if clinically required and authorized).
- Components and abutments necessary for that full-arch bridge.
- A fixed provisional bridge when immediate loading is possible, or another agreed temporary solution.
- Design and fabrication of the final full-arch prosthesis for that arch.
- Standard post-operative follow-up at our clinic during your stay.

Not included (unless specified in your quote):

- Complex bone grafting or sinus lifts beyond the standard protocol.
- Additional medical exams requested by external specialists.
- Travel costs, flights, hotels, or tourism activities (these can be arranged separately as travel packages).

If you have questions about what is included, we will review all details with you before you confirm your treatment.

## 7. INVESTMENT – ALL-ON-4 PRICING

At Dental Solutions International – Puerto Cancún, the investment is:

- Upper arch only (All-on-4 full-arch treatment): USD 12,500
- Lower arch only (All-on-4 full-arch treatment): USD 12,500
- Both arches – full mouth (upper + lower): USD 25,000

In simple terms:

- If you need to rebuild just the top or just the bottom, the investment is 12,500 dollars for that arch.
- If you decide to restore both arches and complete your full mouth rehabilitation, the total investment is 25,000 dollars.

Any special pricing, promotions, or payment structures will always be discussed openly with you and confirmed in writing.

## 8. IS ALL-ON-4 RIGHT FOR YOU, OR ARE VENEERS BETTER?

All-on-4 and veneers are different solutions for different problems.

All-on-4 is usually recommended if you:

- Have many missing or severely damaged teeth.
- Use removable dentures and want something fixed and strong.
- Have been told that most of your teeth cannot be saved.

Veneers are usually recommended if you:

- Still have a full, stable set of teeth.
- Mainly want to change the color, shape, or alignment of your smile.
- Are looking for a minimally invasive cosmetic procedure.

Your 3D tomography, photos, and clinical evaluation will allow our

specialist to recommend the right option for your specific case.

## 9. HOW TO START YOUR PROCESS

If you are considering All-on-4 treatment in Cancún, here are your next steps:

1. Contact our team via WhatsApp or through our website.
2. Complete a short medical and dental questionnaire.
3. Obtain your 3D CBCT scan in your city and send us the digital file.
4. Send us clear photos of your smile and face (front and profile).
5. Our specialist reviews your case and we schedule a virtual consultation.
6. You receive a personalized plan and a proposed calendar for your trips to Cancún, including estimated number of days per visit.

## 10. CONTACT

Dental Solutions International – Puerto Cancún

For questions, case evaluations, or to start your All-on-4 process:

- WhatsApp (international): +52 984 114 5997
